

# Attendance, Workforce & Payroll Management From Your Phone

Staff time in from their phones, a supervisor confirms with a QR scan, and every Daily Time Record is ready to print for payroll, with a QR code an auditor can verify.

From **₱999/month** for up to **10** employees · **14-day free trial**

## THE PROBLEM

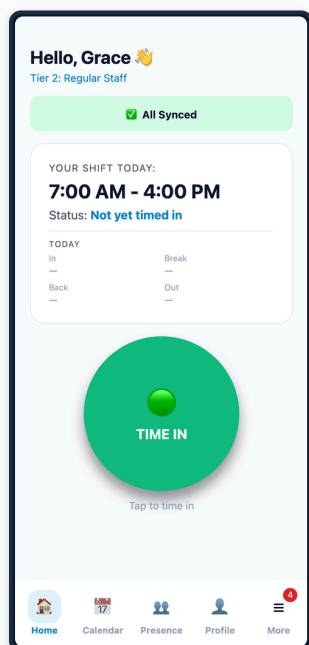

- ✗ Attendance tracked by hand in logbooks and spreadsheets
- ✗ DTRs and payroll prepared by hand before every pay day
- ✗ Affordable biometric systems are hard to get — InyoCheck runs on the phones your team already has.

## HOW IT WORKS — 4 SIMPLE STEPS

1

### Tap TIME IN

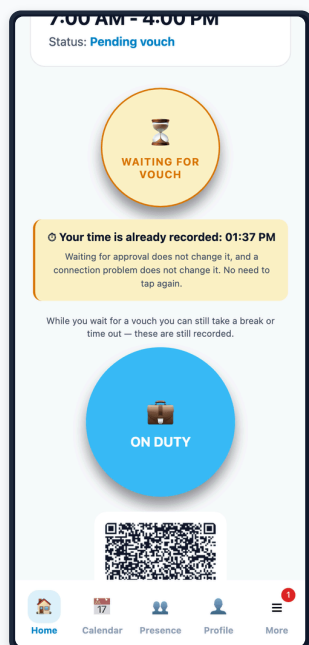

Works without signal: the tap is saved with the real time and sent later.

2

### A Supervisor Confirms

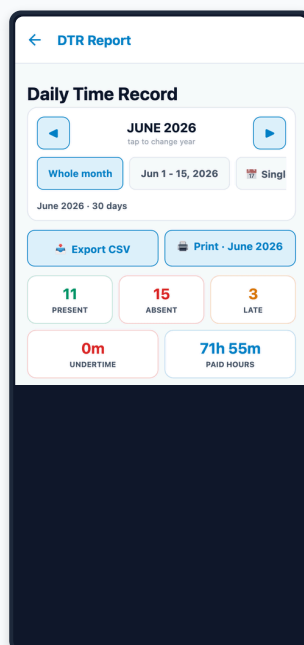

A supervisor confirms with a QR scan.

3

### The DTR Builds Itself

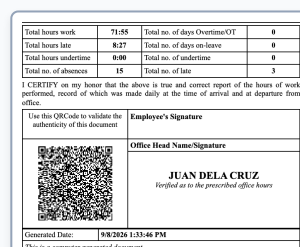

The DTR builds itself (present, absent, late, paid hours).

4

### Print for Payroll

Print it for payroll; its QR lets an auditor verify it.

In use at **Puerto Princesa City Library** and **Artisans Restaurant** (Complete plan, 12-month subscription).

## QUESTIONS PEOPLE ASK

### Q: No internet?

Taps are saved on the phone with the time you tapped and sent automatically when the signal returns.

### Q: Who owns our data?

You do. Records are stored with our host in the EU (Amsterdam), outside the Philippines; your company remains responsible for the lawful basis of that transfer. Location is read only at the moment of recording attendance. You can export everything any time.

### Q: Can we change plans?

Yes, any time: moving up is immediate; moving down never deletes records; time-ins, sync, DTR printing and data export never stop on any plan.

### Q: Can an auditor trust a printed DTR?

Yes: every printed DTR has a QR code to check it is genuine.

### Q: Is there help in the app?

Yes: a bilingual FAQ and a direct line to Inyovision.
